A Mapping of icon names to macros names	22
Index: General	23
Index: L^AT_EX Macros	28

1 What is this?

L^AT_EX style (`azureicons.sty`) which allows you to use the [Azure architectural icons](#) in your L^AT_EX documents.

The Azure SVG icons are converted to L^AT_EX-compatible PDF form using [Inkscape](#) Inkscape 0.92.4 (5da689c313 2019-01-14) using the purpose-written Go program [azure2tex](#).

This Go program, `azure2tex`, creates:

- `azureicons.sty` file
- L^AT_EX-compatible PDF versions of icons (and written to the `icons_tex` directory, using Inkscape).
- This document, which is to illustrate as well as index these icons and their corresponding L^AT_EX macros.

For instructions on how to generate this document with *all* icons, please see the instructions in the [README.md](#) at the github repo.

This document is: <https://github.com/gnewton/azureArchIcons2LaTeX/azureAllIcons.pdf>

This document also includes hyperlinks to Google searches of the titles of each icon.

2 How to use it?

There are two parts:

1. `azureicons.sty` file
2. directory with all of the icons rendered into \LaTeX compatible form (in the repo, this is: `icons.tex`).

All you need to do is use the package to your \LaTeX document using `\usepackage` (after having added the `azureicons.sty` file to where \LaTeX can see it, or put it in the same directory as your document) AND add the directory containing all the generated icons to the `\graphicspath{\dots}`.

For example:

```
% preamble
\usepackage{azureicons}
\graphicspath{../icons_tex/}
% after \begin{document}
Here is a 1cm Data Box:
\DataBox{1cm}
\vspace{1cm}

Here is a 3cm Lambda function:
\AzrMigrate{3cm}
```

Resulting in:

Here is a 1cm Data Box:

Here is a 3cm Azure Migrate:

[Without the gray background]

2.1 Examples

There are more complex examples in the [examples](#) directory.

3 Sources

The Azure Architecture icons used here are from: <https://docs.microsoft.com/en-us/azure/architecture/icons/>.

The specific assets package used: [Azure_Public_Service_Icons_V4.zip](#)

4 Copyright and Terms of Use

- This document: © Glen Newton 2021
- Icons © 2021 Microsoft.
Icon Terms of Use: from Microsoft [Azure Icons - Azure Architecture Center](#):

Microsoft permits the use of these icons in architectural diagrams, training materials, or documentation. You may copy, distribute, and display the icons only for the permitted use unless granted explicit permission by Microsoft. Microsoft reserves all other rights.

A Mapping of icon names to macros names

In order to have reasonably short macro names, the following mappings have been made by `azure2tex`, being careful not to introduce any naming collisions. In addition, \LaTeX macros cannot contain numbers, so all numbers have been mapped to words, i.e. $1 \rightarrow \text{One}$, $5 \rightarrow \text{Five}$, etc. The below mappings are applied in order, followed by the number mappings.

1. Alternate \rightarrow Altern	28. Global \rightarrow Glbl	55. Points \rightarrow Pts
2. Application \rightarrow App	29. Governance \rightarrow Govern	56. Providers \rightarrow Prvdr
3. Archive \rightarrow Archv	30. Groups \rightarrow Grp	57. Profile \rightarrow Prof
4. Attribute \rightarrow Att	31. Internet \rightarrow INet	58. Recovery \rightarrow Recov
5. Attributes \rightarrow Atts	32. Identity \rightarrow Ident	59. Recovery \rightarrow Recov
6. Aurora \rightarrow Aur	33. Image \rightarrow Img	60. Registry \rightarrow Reg
7. Authority \rightarrow Auth	34. Image \rightarrow Img	61. Rendering \rightarrow Rend
8. Azure \rightarrow Azr	35. Instance \rightarrow Inst	62. Replication \rightarrow Repli
9. Account \rightarrow Accnt	36. Integration \rightarrow Integ	63. Resource \rightarrow Res
10. Bucket \rightarrow Bkt	37. Intelligent \rightarrow Intell	64. Search \rightarrow Srch
11. Certificate \rightarrow Cert	38. Kinesis \rightarrow Kin	65. Source \rightarrow Src
12. Compute \rightarrow Cmput	39. Kubernetes \rightarrow Kuber	66. Security \rightarrow Sec
13. Credential \rightarrow Cred	40. License \rightarrow Licns	67. Service \rightarrow Svc
14. Database \rightarrow DB	41. LoadBalancer \rightarrow LB	68. Simulation \rightarrow Simul
15. Database \rightarrow DB	42. Managed \rightarrow Mngd	69. Storage \rightarrow Stor
16. Default \rightarrow Dflt	43. Management \rightarrow Mngmt	70. Stream \rightarrow Strm
17. Development \rightarrow Dev	44. Manager \rightarrow Mngr	71. SystemManager \rightarrow SysMgr
18. Device \rightarrow Dev	45. Medical \rightarrow Med	72. Thing \rightarrow Thng
19. Directory \rightarrow Dir	46. Microsoft \rightarrow MS	73. ThinkBox \rightarrow TB
20. Distribution \rightarrow Distr	47. Migration \rightarrow Migrat	74. TimeSeries \rightarrow TS
21. Elemental \rightarrow Elem	48. Mobile \rightarrow Mob	75. TrainingCertification \rightarrow TrainCert
22. Emergency \rightarrow Emerg	49. Multiple \rightarrow Mult	76. Universal \rightarrow Univer
23. Encrypted \rightarrow Enchr	50. Namespaces \rightarrow NS	77. Vault \rightarrow Vlt
24. Encryption \rightarrow Enchr	51. Notification \rightarrow Notif	78. Virtual \rightarrow Virt
25. Enterprise \rightarrow Entrprs	52. Object \rightarrow Obj	79. Volume \rightarrow Vol
26. Function \rightarrow Func	53. Organizational \rightarrow Org	80. Windows \rightarrow Win
27. General \rightarrow Gen	54. Page \rightarrow Pg	81. Warning \rightarrow Warn
